                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          1983
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  1267

The present invention describes a method of producing plants which are resistant to the herbicides paraquat and diquat, involving inhibiting in the plants a calcium dependent protein kinase (CDPK) and selecting those plants which are resistant to the agrochemical of interest. This is useful in the production of crops with herbicide resistance.

```
The present invention describes a method of producing plants which are resistant to the herbicides paraquat and diquat, involving inhibiting in the plants a calcium dependent protein kinase (CDFK) and selecting those plants which are resistant to the agrochemical of interest. This is useful in the production of crops with herbicide resistance.
                                                                                     2753

The present invention describes a method of producing plants which are resistant to the herbicides paraquat and diquat, involving inhibiting in the plants a calcium dependent protein Kinase (CDPK) and selecting those plants which are resistant to the agrochemical of interest. This is useful in the production of crops with herbicide resistance. 1350 1470 AAMGACGGCAAATTGACTACGCCGAATTTGTAGCCATGATGCAAGGCAGCAACGTTGGA 1910 GGGAGAAGCAGAACCATGATGAAGAACTTGAACTTCAACATTGCTGATGCTTTTGGAGTT 1530 craggergecaaacaargeaaagecagrifgaargragearraagagacgecerceaagra 1970 Producing herbicide resistance plants by inhibiting calcium dependent protein kinase in plants or by providing an intracellular vacuolar transporter capable of transporting agrochemical into plant vacuole 1670 1610 ACAGAGITTGGICTATGTGATACACCICTGGACGACATGATCAAGGAGATTGATCTTGAC TOGGACTITGACAAAGACGGAAAGCGGTTATATCACCATCGATGAGCTTCAGTTGACTTGC ggagancaranggaggartcactrgaagagarrartrgagggrigaraad AATGACGGGAAGATCGATTTCTCGGAGTTTACAGCAATGATGAGGAAAGGAGATGAGTTT TTCGGTGAGCTTAGAGAAGGTTTAAGAAGATTTGGCGCTGAATTTAAGGATACAGAGATT AAGTCTCTCATGGATGCGGCTGATATCGACAACAGTGGTACAATAGACTACGGAGAATTC getgatataárádáaadcegenen elektátaatatatotaataatatatesattateaadaattt Calcium dependent protein kinase; CDPK; herbicide resistance; paraquat; diquat; crop production; ds.                                                                                                                                                              The present invention describes a method of producing plants which are resistant to the herbicides paraquat and diquat, involving inhibiting in the plants a calcium dependent protein Kinase (CDK) and selecting those plants which are resistant to the agrochemical of interest. This is useful in the production of crops with herbicide resistance.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              CGADAGGAGCCCCAAGAAACGCATTTTGTGCTCATGAAGCCTTGTGTCACCATGGATTGT~920~~

                                                                                                                                        The present invention describes a method of producing plants which are resistant to the herbicides paraquat and diquat, involving inhibiting in the plants a calcium dependent protein Kinase (CDPK) and selecting those plants which are resistant to the agrachemical of interest. This is useful in the production of crops with herbicide resistance.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       971 cricgaaccarcartreacrirreaaacreaaccarceccarcacricaaacacrecaaaa 1030

```
The present invention describes a method of producing plants which are resistant to the herbicides paraquat and diquat, involving inhibiting in the plants a calcium dependent protein Kinase (CDPK) and selecting those plants which are resistant to the agrachemical of interest. This is useful in the production of crops with herbicide resistance.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               ggarrercgargaacaaggagcaccagagaaaggcrcrrgarccagcagrcrratercgrc°943

```
The present invention describes a method of producing plants which are resistant to the herbicides paraguat and diquat, involving inhibiting in the plants a calcium dependent protein Kinase (CDFK) and selecting those plants which are resistant to the agrachemical of interest. This is useful in the production of crops with herbicide resistance.
protein kinase in plants or by providing an intracellular vacuolar transporter capable of transporting agrochemical into plant vacuole
